Journal of Fluid Mechanics **Volume 321 25 August 1996**

H. S. Ribner Effects of jet flow on jet noise via an extension to the Lighthill model *page* 1

A. M. Guzmán & C. H. Amon Dynamical flow characterization of transitional and chaotic regimes in converging–diverging channels 25

M. Gharib & A. Weigand Experimental studies of vortex disconnection and connection at a free surface 59

K. M. Watson & S. B. Buchsbaum Interaction of capillary waves with longer waves. Part 1. General theory and specific applications to waves in one dimension 87

A. Zebib Thermal convection in a magnetic fluid 121

L. K. Forbes & S. R. Belward Atmospheric solitary waves: some applications to the morning glory of the Gulf of Carpentaria 137

L. Kaiktsis, G. E. Karniadakis & S. A. Orszag Unsteadiness and convective instabilities in two-dimensional flow over a backward-facing step 157

K. W. Cassel, A. I. Ruban & J. D. A. Walker The influence of wall cooling on hypersonic boundary-layer separation and stability 189

D. F. Hill & M. A. Foda Subharmonic resonance of short internal standing waves by progressive surface waves 217

P. K. Yeung Multi-scalar triadic interactions in differential diffusion with and without mean scalar gradients 235

S. W. Joo, S. H. Davis & S. G. Bankoff A mechanism for rivulet formation in heated falling films 279

S. Narimousa Penetrative turbulent convection into a rotating two-layer fluid 299

J. R. Taylor & G. Veronis Experiments on double-diffusive sugar–salt fingers at high stability ratio 315

R. R. Kerswell Upper bounds on the energy dissipation in turbulent precession 335

G. P. Krishnan, S. Beimfohr & D. T. Leighton Shear-induced radial segregation in bidisperse suspensions 371

M. Loewenberg & E. J. Hinch Numerical simulation of a concentrated emulsion in shear flow 395

T. Maxworthy, C. Gnann, M. Kürten & F. Durst Experiments on the rise of air bubbles in clean viscous liquids 421

REVIEW

Turbulent Reacting Flames, edited by P. A. Libby & F. A. Williams 442
